“CSIR-Integrated Skill Initiative”

“CSIR-Integrated Skill Initiative” is a national program on skill development initiated by Council of Scientific and Industrial Research (CSIR) using the expertise and infrastructure of CSIR laboratories positioned across the country. CSIR-Central Salt and Marine Chemicals Research Institute (CSIR-CSMCRI), Bhavnagar is a leading constituent laboratory dedicated towards multidisciplinary R&D programs of both basic and applied sciences. Under skill India initiative CSIR-CSMCRI, the only R&D laboratory of CSIR in Gujarat, proposes to organize the following Training programs.

Applications are invited from the eligible candidates for the following training programs:

Sr. No	Name of Training Program	Mode of training	Duration	Maximum No. of Intake	Qualification and Remarks	Last date of application
1.	Plant Tissue Culture and Gene Technology	Offline	24 th July, 2023 to 28 th July, 2023	20	B.Sc. (Passed out) and above	8 th July, 2023 through e-mail only to ptc.gt.csmcriskill22@gmail.com

☐ Training program Fee

Rs. 1000/- + Rs.180/- GST = Rs.1180/-	<input type="checkbox"/> Category I : Self- sponsored [Students, Individual (other than student) and Entrepreneur (as an individual)]
Rs. 5000/- + Rs.900/-GST = Rs.5900/-	<input type="checkbox"/> Category II : Any sponsored candidate (Government, Industry and sponsored by Entrepreneur)

- Fee is non-refundable. Only the selected candidates will be intimated regarding online fee payment (Bank details is attached).
- The Training program fee has to be deposited through **NEFT or RTGS only**.
- Mode of communication would be either in हिन्दी & / or in English.
- Tea (two times) and Lunch will be provided during training program.
- Lodging & boarding arrangements of selected candidates will be done by their own.
- Certificates will be provided to the candidates who successfully complete the training program.
- Training venue** : CSIR-CSMCRI, Bhavnagar

How to apply and Selection:

- Maximum numbers of intake are limited as mentioned above on “first-cum-first-served basis with having fulfilment of qualification criteria, payment and other terms and conditions”. For sending of applications, payment and any query about the training program you can contact by email: mangalathore@csmcri.res.in
- One self-attested set of documents to be submitted along with application as attachment.
- The selected candidates will be intimated by email. The training program fee has to be deposited within 3 days of email from us about selection.
- Incomplete applications shall not be considered.
- These are training programs and it would, therefore, not confer any right/claim implicit or explicit for any candidates for claiming extension or absorption in CSIR – CSMCRI / CSIR.
- No traveling or any other allowances will be paid to candidate for training program.

SALIENT FEATURES OF THE TRAINING PROGRAM ON “PLANT TISSUE CULTURE AND GENE TECHNOLOGY”

Brief Job Description for Trained Person: The person will be responsible for selection of material for tissue culture establishment, media preparation, culture generation, culture multiplication, plant production, and quality control etc. in plant tissue culture and biotechnology industries.

Personal Attributes: The individual should have basic knowledge of plant propagation techniques, culture establishment, and production of plants. The person should have knowledge of the functioning of different instruments pertaining to the functioning of plant tissue culture and biotechnology laboratory.

Training program Structure: The training programs will comprise of lectures and hands-on sessions.

The following topics will be covered in the training program.

A. Plant Tissue Culture

1. Basic introduction to plant tissue culture

- a) Fundamentals of plant tissue culture
- b) Organization of plant tissue culture laboratory
- c) Techniques of plant tissue culture
- d) Types of cultures- a brief overview
- e) Basic functioning of commonly used instruments in plant tissue culture

2. Tissue culture media and its preparation

- a) Basic concept of plant tissue culture medium and different types of media
- b) Components of plant tissue culture medium
- c) Plant hormones and their applications in plant tissue culture
- d) Preparation of stocks for plant hormones and media constituents
- e) Preparation of medium

3. Sterilization- Culture media and Explant sterilization

- a) Dis-infection process and its requirement in plant tissue culture
- b) Types of sterilization and sterilization agents
- c) Process of sterilization- sterilization of medium, plant hormones, and explant etc.

4. Types of culture and Culture establishment

- a) Types of cultures and their need
- b) Explant and critical precautions in selection of explant
- c) A generalized protocol to establish tissue culture of a plant

5. Culture multiplication

- a) Multiplication of culture- why and how
- b) Process of multiplication

6. Plant regeneration, soil transplantation and acclimatization

- a) Culture regeneration / organogenesis - why and how
- b) Shoot and plant regeneration
- c) Root regeneration- in vitro and ex vitro
- d) Soil transplantation
- e) Acclimation

7. Genetic purity assessment of regenerates

- a) Genetic purity - Basic introduction and its requirement
- b) Process / methods to assess the genetic purity of tissue culture regenerates
- c) Polymerase chain reaction and its functioning
- d) Setting up a PCR reaction and product detection on agarose gel
- e) An introduction to RAPD and AFLP markers for genetic purity assessment
- f) ISSR and SSR markers for genetic purity assessment

8. Commercial aspect of plant tissue culture

- a) Application of plant tissue culture
- b) Successful stories
- c) Banana tissue culture
- d) Date Palm tissue culture
- e) Bamboo tissue culture
- f) Santalum tissue culture
- g) Potential plant species for tissue culture

B. Gene Technology

1. Introduction to Gene technology

- a) Basic concept of Gene technology
- b) Importance and Commercial applications

2. Isolation and quantification of DNA

- a) Isolation of plasmid DNA from E. coli
- b) Isolation of genomic DNA from plants
- c) DNA quantification by Nanodrop

3. Bacterial cell culture and genetic transformation

- a) Preparation of competent E. coli bacterial strain
- b) Transformation of E. coli
- c) Screening of transformants

4. Polymerase chain reaction (PCR) for commercial application

- a) Basic concept and principles of PCR
- b) Components of standard PCR reaction
- c) Running a standard PCR reaction
- d) Commercial applications of PCR technique

5. Genetic transformation of model plant

- a) Preparations for genetic transformation
- b) Co-culture and regeneration of transformants

6. Selection of positive transformant- GUS and PCR assay

- a) Screening of positive transformants
- b) GUS assay
- c) PCR assay

Training program duration: 5 days
